

## Lab 07 (Oct 18)

In this lab task, you are required to develop a responsive web page for the homepage of the department's website (cs-homepage.html).

1. Design four wireframes for the web page. Draw the wireframes on a page.
  - a. For mobile phone (up to 400 pixels)
  - b. For medium sized screens (up to 800 pixels)
  - c. For large screens (above 800 pixels)
  - d. For printing
2. Use grid and media queries to implement the four wireframes you designed in task 1.
3. Use colors, alignments, paddings, margins and other suitable properties to make the web page visually attractive and usable (please do this task in the end).
